Vienna, Austria | evanpapanast@gmail.com | Portfolio

Finance & Commercial Insights | Performance Reporting · Power BI · KPI Design

PROFILE

Finance and analytics professional with 10+ years connecting financial and commercial data to business decisions. I started in financial reporting and consolidation (IBM, Emarsys) and moved into performance reporting and analytics in an NGO (WWF) and in pharma (MSD). I replace manual Excel reporting with automated, daily-refreshed dashboards: budget vs actual for every WWF HQ business unit, sales reporting for MSD's commercial and FP&A teams and a combined SAP, IQVIA and CRM view for commercial teams. Hold an MSc in Financial Economics and am pursuing an MBA in Digital Management.

KEY ACHIEVEMENTS

- **Budget vs actual for the whole HQ:** delivered daily-refreshed Tableau reporting for all WWF HQ business units, combining Oracle actuals with budget data and saving the finance team at least 3 days of work.
- **Sales reporting automated:** replaced a manually maintained Excel sales file used by MSD's commercial and FP&A teams with a Power BI report on the previous day's data, saving at least 4 days of work.
- **Commercial performance in one view:** built an Oncology 360 dashboard combining SAP, IQVIA and CRM data, saving analysts at least two weeks of manual reporting.
- **Finance process automation:** automated booking corrections in Oracle Grants with IT, saving project finance at least 1 day at each grant closing.

PROFESSIONAL EXPERIENCE

Senior Business Intelligence Analyst | MSD, Vienna — Oct 2022 – Jul 2026

- Member of MSD Austria's data team, serving the Commercial, Marketing and FP&A teams as internal clients: translated business questions into KPIs, data models and actionable Power BI reports.
- Replaced a manually updated Excel sales file used by the commercial and FP&A teams with a Power BI report refreshed daily, saving at least 4 days of work.
- Built an Oncology 360 dashboard integrating SAP, IQVIA and CRM data, giving commercial teams a combined performance view for the first time and saving business analysts at least two weeks of manual updates.
- Analyzed marketing campaign performance with sales and financial data to guide commercial priorities and resource allocation.
- Modelled data on AWS Redshift's curated layer; led the Power BI rollout to 50+ users and trained teams to self-serve.
- Led a global content-tagging initiative across all MSD entities, launching within 4 months the one-stop tagging website that is still the single source of truth.

Senior Business Reporting Specialist | WWF, Vienna — May 2017 – Oct 2022

- Delivered budget-vs-actual reporting in Tableau for all HQ business units (incl. marketing, finance and commercial), combining Oracle actuals with budget data. Worked with a business analyst and the data-warehouse team; replaced a manual Excel process with daily refresh and saved at least 3 days of work.
- Automated booking corrections in the Oracle Grants module with IT during grant closing, saving the project finance team at least 1 day of work.
- Built and owned business and financial reporting for global stakeholders, aligned with strategic priorities and resource allocation.
- Subject-matter expert for the financial reporting tool (Noetix), including Oracle Grants Management; harmonized reporting processes and trained users.

Group Financial Controller | Emarsys, Vienna — Sep 2016 – Feb 2017

- Ran budgeting and consolidation across group entities, delivering reporting for executive decisions.

Reporting & Consolidation Analyst | IBM, Bratislava — Dec 2014 – Sep 2016

- Delivered recurring financial reporting and consolidation within month-end close cycles.

PROJECTS

Personal data projects on free, openly licensed public data, built with Claude as an AI pair; live reports and code: evanpapanast.github.io/experiments

- **Iowa spirits market, price vs volume and budget:** management report on 34 million public sales records in Google BigQuery: price-volume-mix bridge, budget vs actual, a BigQuery ML forecast and an interactive 2027 budget builder, with 33 automated data-quality checks.
- **ECB speeches vs interest rates:** tested whether the tone of 2,657 central bank speeches predicts 63 rate decisions, with the rules fixed in advance (Python, text analysis).
- **AI adoption in EU enterprises:** interactive report on Eurostat data, modelled in BigQuery with SQL and an automated data-quality gate.

SKILLS

- **Finance:** FP&A support, budget vs actual, financial reporting, budgeting, consolidation, month-end close
- **Commercial analytics:** KPI design, sales and campaign performance, CRM data (Veeva), IQVIA market data
- **Reporting & BI:** Power BI (data modelling, Power Query), Tableau, SQL, AWS Redshift, Advanced Excel
- **Cloud & AI tools:** Google BigQuery (SQL, views, AI.FORECAST), Git and GitHub (branches, pull requests, Actions), Claude with connectors (AI-assisted development)
- **Systems:** SAP, Oracle (incl. Grants Management), Veeva CRM
- **Ways of working:** business partnering, requirements gathering, training and self-service enablement, process automation
