EVANGELOS PAPANASTASIS

Vienna, Austria | evanpapanast@gmail.com | Portfolio

Data & AI Transformation | Analytics Leadership | Power BI · Data Governance

PROFILE

Analytics and transformation professional with 10+ years across pharma, NGO and corporate finance. I turn scattered data, tools and processes into one trusted source that business teams use. At MSD I led a global data-harmonization initiative across all MSD entities, built the Austrian affiliate's first Power BI dashboards and rolled Power BI out to 50+ users. At WWF I automated finance processes and built daily budget-vs-actual reporting for every HQ business unit. I bring a finance background (IBM, Emarsys), work comfortably from executives to analysts, and am pursuing an MBA in Digital Management focused on data-driven decision-making and AI.

KEY ACHIEVEMENTS

- **Global single source of truth, delivered in 4 months:** designed and launched, with an external agency, MSD's global tagging hub used by all MSD entities. It replaced country-by-country materials and is still the company's one source of truth.
- **First-of-its-kind dashboards at MSD Austria:** built the affiliate's first Power BI dashboards from scratch, including an Oncology 360 view combining SAP, IQVIA and CRM data that saves analysts at least two weeks of manual reporting.
- **Manual reporting replaced with daily refresh:** automated sales reporting for the commercial and FP&A teams at MSD (at least 4 days saved) and budget-vs-actual reporting for all WWF HQ business units (at least 3 days saved).
- **End-to-end platform ownership:** designed and built a commercial BI platform in Power BI, rolled it out to 50+ users, and ran training, ongoing support and upgrades as business needs evolved.

PROFESSIONAL EXPERIENCE

Senior Business Intelligence Analyst | MSD, Vienna — Oct 2022 – Jul 2026

- Member of MSD Austria's data team, serving the Commercial, Marketing and FP&A teams as internal clients.
- Led a global content-tagging initiative spanning all MSD entities: gathered requirements from executives to analysts, designed the information structure and, with an external agency, launched a one-stop tagging website within 4 months. It replaced fragmented country materials and remains the single source of truth.
- Built MSD Austria's first multi-channel marketing (emails, calls, print materials) dashboard in Power BI, combining tagging and CRM data on sends, open rates and click rates; now used by all commercial teams.
- Created an Oncology 360 dashboard integrating SAP, IQVIA and CRM data, giving commercial teams a combined view for the first time and saving business analysts at least two weeks of manual report updates.
- Replaced a manually maintained Excel sales file used by the commercial and FP&A teams with a Power BI report refreshed daily, saving at least 4 days of work.
- Gathered business requirements, then designed, scoped and built MSD Austria's commercial BI platform in Power BI on AWS Redshift's curated layer. Led the rollout to 50+ users and owned it end to end: user training, ongoing support, maintenance and upgrades as business needs evolved.
- Drove GenAI adoption as GenAI Ambassador: designed a 4-week upskilling plan for employees, from prompting basics to applied use cases, and gathered and prioritised business use cases for automation.

Senior Business Reporting Specialist | WWF, Vienna — May 2017 – Oct 2022

- Designed and built a budget-vs-actual reporting solution in Tableau for all HQ business units (incl. marketing, finance and commercial), combining Oracle actuals with budget data; working with a business analyst and the data-warehouse team, replaced a manual Excel process with daily refresh and saved at least 5 days of work.
- Worked with IT to automate booking corrections in the Oracle Grants module during grant closing, saving the project finance team at least 1 day of work during closing period.
- Business lead in user acceptance testing (UAT) with IT for the Oracle Grants Management module and the Noetix reporting tool; harmonized reporting processes and drove adoption through training and self-service.
- Built and owned business and financial reporting for global stakeholders, aligned with strategic priorities and resource allocation.

Group Financial Controller | Emarsys, Vienna — Sep 2016 – Feb 2017

- Ran budgeting and consolidation across group entities, delivering reporting for executive decisions.
- Ensured data quality for the group ERP rollout by owning the data-cleansing workstream ahead of migration.

Reporting & Consolidation Analyst | IBM, Bratislava — Dec 2014 – Sep 2016

- Delivered recurring financial reporting and consolidation within month-end close cycles.

SKILLS

- **Transformation & delivery:** requirements gathering from executives to analysts, information architecture, agency and IT collaboration, system migrations (Oracle Grants Management), training and adoption
- **Data & analytics:** Power BI (data modelling, Power Query, DAX), SQL, AWS Redshift, Tableau, Advanced Excel
- **Data management:** data governance, data quality, data lineage, cross-market data harmonization
- **Data sources:** SAP, IQVIA, Veeva CRM, Oracle
- **AI & cloud tools:** GenAI and Microsoft Copilot use-case discovery, agents, Claude with connectors (AI-assisted development), Google BigQuery (incl. AI.FORECAST), Git and GitHub (pull requests, Actions)
- **Finance:** financial reporting, budgeting, budget vs actual, consolidation
